Better Laboratory Services is our Passion!

Written by Yann Gerville-Reache, COO

'Urine, you're out!' What's that about?! We mentioned before that we had exciting new tests coming your way. We are now providing customers the option to conduct their toxicology tests with a few blood droplets from a finger prick. Are patients uncomfortable with or is it difficult for them to provide a urine sample? How about your clinic? Are they tired of the mess with urine? We love this option! It provides many benefits in patient care. This test also measures various hormone levels. See our One-Touch Toxicology Panel and associated materials on our document library.

Be sure to keep up to date with new developments that are soon to be released. Stay tuned!

Thank you for being interested and keeping up to date on heliosDX. We invite you to learn more on a regular basis by joining us on our website and social media links found below.

URINE, You're OUT!

Tired of managing cups
of pee? Our **NEW Blood
Droplet Test** is Here!

The NEW heliosDX Blood Droplet Test is designed to replace your old urine toxicology test. Samples are easy to collect, and no restroom visits or prep areas are required. The test offers over 60 analytes quantitated covering 22 classes, and can also measure 6 hormones.

What's coming up?

June

New One-Touch Blood
Toxicology Testing Service
Release

National Blood Donor Month

Healthy Homes Month

Safety Month

17-24 Nursing Assistant Week

21-25 Health Risk Management

LAB EXPERTISE

heliosDX has received its Z-codes for PCR UTI testing from Palmetto GBA® for the MoIDX program. Our technical assessments are being reviewed, and we are anxiously anticipating their approval. The ability to successfully execute the MoIDX requirements for our in-house PCR UTI panel sets the tone and the **persistence** that we feel is necessary in order to expand our PCR panels even further. Looking forward, we intend on bringing additional PCR panels in-house. We currently offer a variety of PCR panels through our lab partners; however, we will lean on our experience and expert laboratory team to expand our in house service which provides optimal turnaround for clinics and their patients.

WE WANT TO THANK YOU

heliosDX thanks you, the readers, the practices, the employees, practitioners, and the owners that dedicate your lives to assisting others. We know the challenges that are faced within the healthcare industry, whether it be proving yourself within your field, learning and navigating new regulations, or just feeling the general grind after long hours. We at heliosDX commend and praise you. We know it's persistence and focus that keeps things moving forward. We're always looking for cutting edge improvements for ourselves as well and we'll be turning it up a notch with system improvements as we move through this summer. Can't wait to share!

GROWTH & EXPANSION

heliosDX, through its parent company RushNet, Inc. has recently filed the necessary paperwork to raise capital for its future growth plans. Along with its recent PCAOB audits being completed, heliosDX has successfully achieved two major steps towards becoming a separately traded public entity and acquiring another laboratory as was mentioned in our previous Crossroad. The future developments we anticipate will serve us to grow our business, expand patient care, improve laboratory systems for user friendly experiences and streamlined processes.

"WE ARE ALWAYS FOCUSED ON UPHOLDING PATIENT CARE. FROM THE SYSTEMS WE USE TO THE SERVICES WE PROVIDE, WE ARE ALWAYS ASSESSING WHETHER THIS ADDS VALUE TO PATIENTS." ~ ASHLEY SWEAT, CEO
