Better Laboratory Services is our Passion!

Written by Yann Gerville-Reache, COO

Hormone testing is now here! We have officially rolled out our blood droplet kit for hormone testing this month to provide health professionals better knowledge about their patients and to improve the quality of treatment plans. This panel provides 29 tests for a holistic view of critical hormones. We've uploaded our requisition, relevant studies, collection instructions and pain management insights to our document library heliosdx.com/library. When a patient complains of fatigue, libido changes, and decreased effectiveness of medications - Hormone Replacement Therapy (HRT) may be indicated. Clinical symptoms such as depression, insomnia, hyperalgesia, allodynia, and opioid tolerance are often only a piece of the puzzle when treating a patient's pain.

We are also proud to announce that we are offering Human Monkeypox testing found on our infectious disease panel, and don't forget to check out our One-Touch Toxicology blood droplet kit.

Thank you for being interested and keeping up to date on heliosDX. Check out more on our website and social media links found below.

On the Calendar

August

Monkeypox Testing now available

New Hormone Blood Droplet Testing Rollout

New One-Touch Blood Toxicology Testing Service Rollout

National Health Observances:

- Immunization
- Children's Eye Health & Safety
- Breastfeeding

URINE, You're OUT!

Tired of managing cups of pee? Our **NEW Blood Droplet Test** is Here!

The NEW heliosDX Blood Droplet Test is designed to replace your old urine toxicology test. Samples are easy to collect, and no restroom visits or prep areas are required. The test offers over 60 analytes quantitated covering 22 classes, and can also measure 6 hormones.

LABORATORY EXCELLENCE

heliosDX is pleased to announce the addition of two expert lab directors which will maintain and control our laboratory compliance programs and monitor our growing operations. We welcome Janetta Bryksin and Anton Bryksin to the heliosDX team! These two individuals have come onboard to manage our standard procedures, set new standards, supervise and review technical assessments and proficiency testing, oversee the application processes such as the MolDX program, oversee audits and preparations for the same, and provide guidance and support over the entire laboratory for both Toxicology and Infectious Disease. We are very pleased to have these talented individuals as part of our team.

HUMAN MONKEYPOX

As case counts continue to rise across the US, heliosDX has taken action to ensure that patients can be tested and properly cared for by their practitioner. As reported by the CDC, the virus has reached 14,115 cases in the US as of August 18th, 2022 with the hardest hit states being NY, CA, and then FL. For more information about the virus visit: www.cdc.gov/poxvirus/monkeypox/

For our clinics and practices interested in fast and reliable PCR testing services for this virus and other illnesses please visit our website or contact us directly at 1-833-HELIOS8 (833-435-4678)

REACHING NEW HEIGHTS

heliosDX, through its parent company RushNet, Inc. patiently awaits approvals from the SEC and FINRA to move forward on its plan to split out and become a separately traded public entity. We have recently received feedback from these governing bodies which our legal counsel deem to be standard and for which they feel confident that their responses will satisfy all of the feedback received. This puts us closer to our goals of acquiring future laboratories and expanding the heliosDX brand in the near future. In the meantime, our anticipated acquisition is ready and likely to be executed soon in Q3 2022.

"WE ARE ALWAYS FOCUSED ON UPHOLDING PATIENT CARE. FROM THE SYSTEMS WE USE TO THE SERVICES WE PROVIDE, WE ARE ALWAYS ASSESSING WHETHER THIS ADDS VALUE TO PATIENTS." ~ ASHLEY SWEAT, CEO
