Better Laboratory Services is our Passion!

Written by Yann Gerville-Reache, COO

heliosDX is in discussions with a reputable Clinical Diagnostic Laboratory local to the Northeast Florida area to potentially move forward with an acquisition early next quarter. This opportunity presents a plethora of opportunity and benefits for both laboratories. Synergies have been discussed that could potentially bring significant additional revenues, above what both laboratories currently generate. The PCR capabilities of the combined labs will enable us to grow faster than originally anticipated. This potential acquisition also has a substantial amount of walk-in patient volume which makes the acquisition that much more attractive.

To recap the releases from the past few months, we also provide Blood Hormone and Blood Toxicology testing with a simple finger prick and we added testing to our PCR panel for Human Monkeypox.

We've uploaded our requisition, relevant studies, collection instructions and pain management insights to our document library at heliosdx.com/library.

Thank you for being interested and keeping up to date on heliosDX. Check out more on our website and social media links.

On the Calendar

September

Growth through Acquisition in discussion

New Testing:

Monkeypox Testing

Hormone Blood Droplet

One-Touch Blood Toxicology

Health Observances:

Lymphoma Awareness

Alzheimer's Day - 21st

Heart Day - 29th

URINE, You're OUT!

Tired of managing cups of pee? Our **NEW Blood Droplet Test** is Here!

The NEW heliosDX Blood Droplet Test is designed to replace your old urine toxicology test. Samples are easy to collect, and no restroom visits or prep areas are required. The test offers over 60 analytes quantitated covering 22 classes, and can also measure 6 hormones.

PROVIDER CONTRACTS

heliosDX strives to provide its services nationally with in-network contracts so that our patient base receives the best care with their coverage. Much of the credit with our contracts goes to our credentialer, Rose Dallman. We appreciate all she does in support of that effort! We're also adding additional team members to this effort to reach more coverage for our national customer base. For our clinics and practices interested in fast and reliable Toxicology, PCR, and hormone testing services, please visit our website or contact us directly at 1-833-HELIOS8 (833-435-4678).

LABORATORY EXCELLENCE

heliosDX has recently submitted additional supporting documentation for the MoIDX program and is scheduled to meet with Palmetto GBA. With our lab director and advisor, Janetta Bryksin and Anton Bryksin, and our Director of Laboratory Operations, Taylor Vick, at the helm we are preparing for a fruitful conversation which we have high hopes will lead us to approval status. This not only continues to show our excellence in the laboratory compliance arena, but also allows us to forge forward with our PCR program. Our In-House foundation remains with the PCR UTI testing and this development opens us up to further panels in the near future including: Respiratory, Women's Health, Wound Care, Ear Nose and Throat, and other PCR testing.

REACHING NEW HEIGHTS

heliosDX, through its parent company RushNet, Inc. patiently awaits approvals from the SEC and FINRA to move forward on its plan to split out and become a separately traded public entity. With the support of our legal counsel we have recently submitted our answers in hopes of a final approval. This puts us closer to our goals of acquiring future laboratories and expanding the heliosDX brand in the near future. We are now well positioned to action both of our anticipated acquisitions, slated during 3rd Quarter of 2022.

"WE ARE ALWAYS FOCUSED ON UPHOLDING PATIENT CARE. FROM THE SYSTEMS WE USE TO THE SERVICES WE PROVIDE, WE ARE ALWAYS ASSESSING WHETHER THIS ADDS VALUE TO PATIENTS." ~ ASHLEY SWEAT, CEO
